IMAGE VIEWER

Images can be viewed by various viewing options. Easily compare the client's images with "Overlay screen", "View at a glance mode", and "Compare by time and light sources."

SKIN ANALYSIS

LineVu offers fourteen analysis modes including summary views and deep dives by skin concern. Red & Brown Analysis shows vascular conditions and pigmentation regardless of ethnicity.

Line -Vu

Innovative Facial Skin Analyzer

Line-Vu, the world's first LED skin analyzer with four distinct light sources delivers high-resolution images and in-depth analysis.

The **"Filter In and Out system"** makes clear images for normal light and ultraviolet light images.

Line-Vu's advanced technology doesn't stop at your face – it extends to your neck, having the capability to capture and analyze neck wrinkles.

Our facial skin analyzer empowers you with a meticulous examination of neck wrinkles, providing insights for holistic skincare and treatment options.

Skin Analysis Report

Simply scan the QR code to reveal your personalized skin analysis report in seconds.

Easily share comprehensive information about your client's current skin condition by sending personalized reports directly to them.

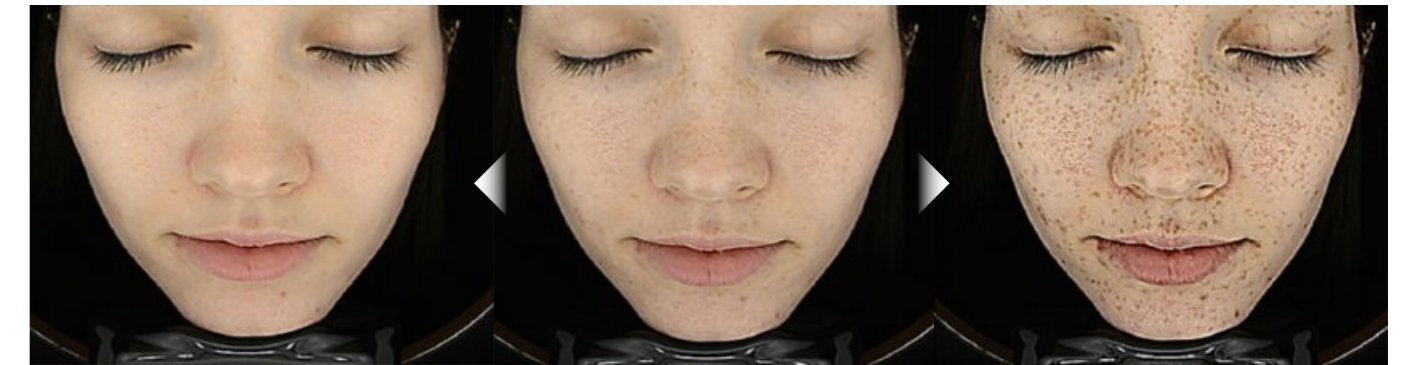

VIRTUAL LASER TREATMENT

Virtual laser treatment helps to show your clients their expected results of pigmentation treatment and gives them a better understanding of the procedure.

EFFECTIVE VIEWER FUNCTIONALITY

Clients can be shown how **wrinkles, even hidden wrikles and pigmentation** may appear without treatment. Consult with our "Simulation mode" for effective communication.

3D viewer provides visuals from various dimensions and angles to assess the depth and size of pores, wrinkles, and skin texture.

Smart Viewer comes in handy when viewing client's data remotely. Use Tablet PCs to conveniently show analyzed images and data with our interworking service.
